

# The wild Life of Waterflea Daffy

Waterfleas populate our waters.

Researchers go after them to figure out their love and life style.

We looked a little bit more closely, were amazed and ask: What's science and what's fiction? but look for yourself...

Koin, koin!  
\*Hi, I am Daffy, the waterflea..  
I'd like to tell you some stories about the wild life of waterfleas..  
especially.. what you always wanted to know about waterfleas..  
..but you never dared to ask

... the true reason for the day-night migration of the daphnids ...  
at night ...

Bar EPIILIMNION

there are many rumours about the clear water state of our lakes..  
..again, waterfleas are at work

Spring cleaning in the lake

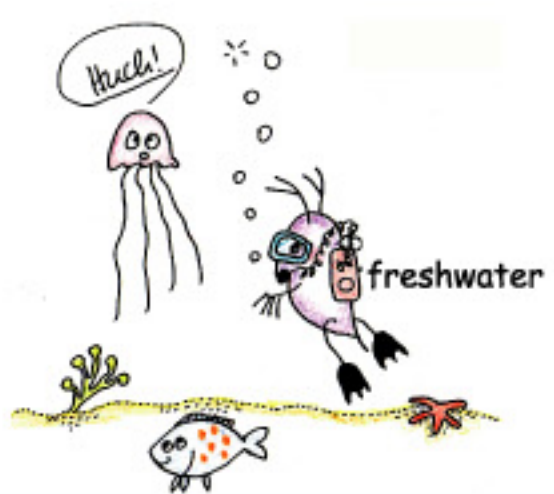

...the reward for the work

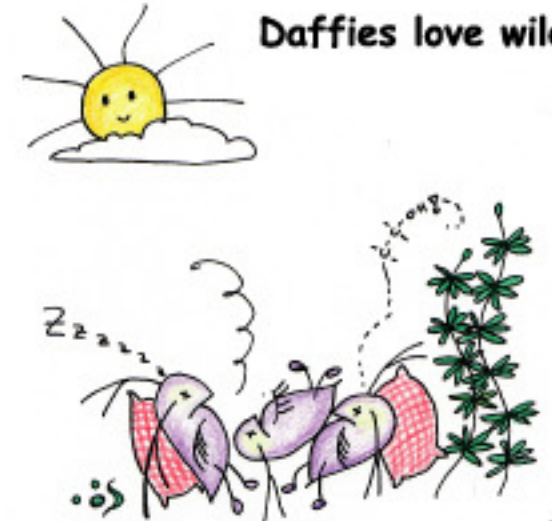

Daffies have a small mistake..  
sloppy eating!

Daffies love freshwater above all...

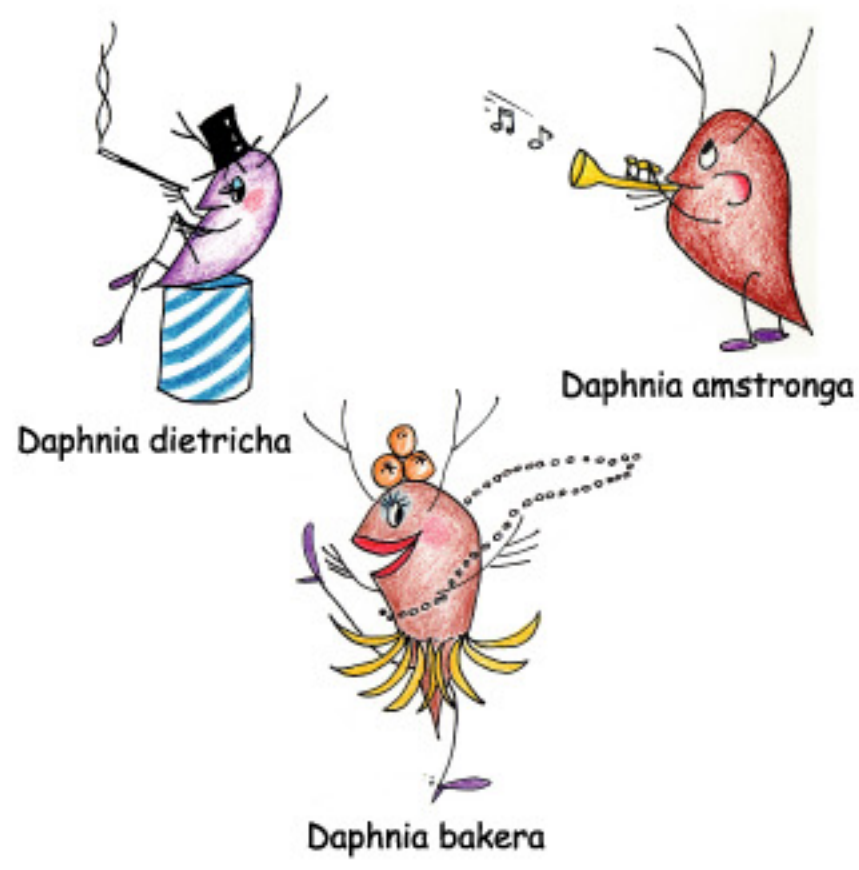

at day ...  
Daffies love wild parties!

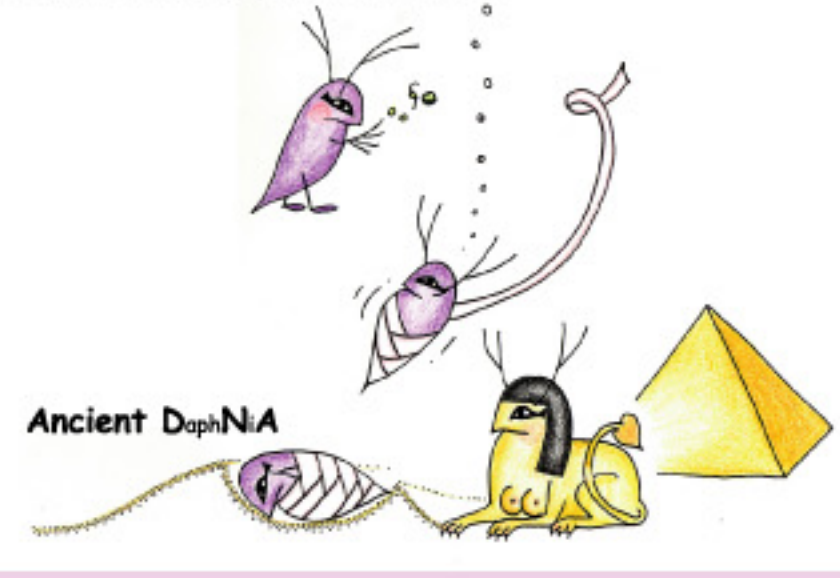

Grotto HYPOLIMNION

There are even lots of artists and special characters among the Daffies ..

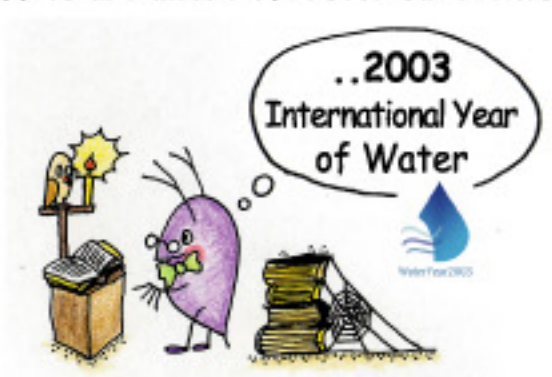

Daffies have a long history ...

Ancient DaphNIA

... Daffies are aware of historical events

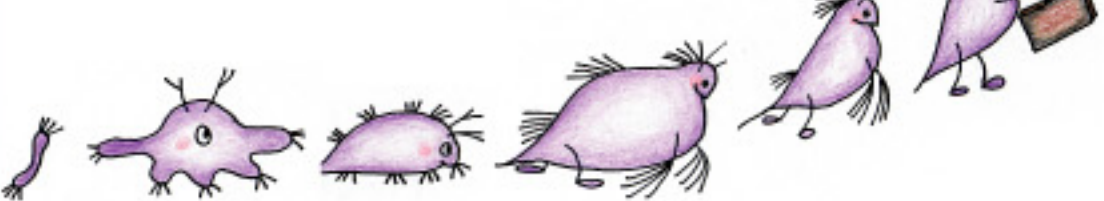

..2003 International Year of Water

but once in a while ...

they change their mind ..

also Daffies wonder..  
Where are we coming from...  
...and where are we going ??
