

# Table of contents

**Foreword by Ban Ki-moon, Secretary-General, United Nations** v

**Foreword by Koïchiro Matsuura, Director-General, United Nations Economic, Scientific and Cultural Organization** vii

**Preface** ix

**Acknowledgements** xiii

**Overview of key messages** xix

## **Water in a changing world** 1

### **Chapter 1 Getting out of the box – linking water to decisions for sustainable development** 3

Opening the water box 4  
Sustainable development as the framework for water management 6  
Investing in water 9  
Global crises and water 14  
The need for action – now 20  
Structure of the Report 21

## **Part 1 Understanding what drives the pressures on water** 24

### **Chapter 2 Demographic, economic and social drivers** 29

Demographic drivers 29  
Economic drivers 32  
Social drivers 36

### **Chapter 3 Technological innovation** 41

Recent trends and advances in science and technology 42  
The technology dissemination challenge 45

### **Chapter 4 Policies, laws and finance** 49

Policies and laws 49  
Financing – the missing link 56

### **Chapter 5 Climate change and possible futures** 68

The influence of climate change on the other drivers of change 69  
Identifying possible futures: the need for scenarios 74  
Challenges for summarizing the pressures of external drivers on water resources 75

## **Part 2 Using water** 77

### **Chapter 6 Water's many benefits** 80

Water for economic development 81  
Water and poverty reduction 83  
Water and health 88  
Maintaining ecosystem services 91

### **Chapter 7 Evolution of water use** 96

Water use in the world 97  
Domestic water supply and sanitation 102  
Water use in agriculture 106  
Water for industry and energy 115

## Table of contents

---

In-stream water uses	120
<b>Chapter 8 Impacts of water use on water systems and the environment</b>	<b>127</b>
How water use affects water resources	128
Seeking sustainable management of groundwater	131
Growing risks: pollution and degradation of water quality	136
Progress in mitigating pollution	139
Progress in achieving environmental sustainability	145
<b>Chapter 9 Managing competition for water and the pressure on ecosystems</b>	<b>150</b>
Type, extent and effect of competition for water	150
Managing competition through supply and demand management and reallocation	154
<b>Part 3 State of the resource</b>	<b>160</b>
<b>Chapter 10 The Earth's natural water cycles</b>	<b>166</b>
Overview of the global hydrologic cycle	166
Relationship of water to global biogeochemical cycles	172
<b>Chapter 11 Changes in the global water cycle</b>	<b>181</b>
Changes in the water cycle	181
Links between the terrestrial carbon and water cycles	196
Is the hydrologic cycle accelerating?	200
Assessing future impacts of climate change	201
Summary	202
<b>Chapter 12 Evolving hazards – and emerging opportunities</b>	<b>211</b>
Hazards vary with climate regions	211
Changes in average streamflow	212
Changes in extreme events	213
Changes in groundwater	217
Changes in erosion, landslides, river morphology and sedimentation patterns	217
Challenges: hazards and opportunities	222
<b>Chapter 13 Bridging the observational gap</b>	<b>226</b>
The importance of hydrologic observations	226
Recent developments in observation methods, networks and monitoring	227
Changing status of operational data over the recent past	228
Opportunities and challenges	234
Some suggestions for bridging the observational gap	235
<b>Part 4 Responses and choices</b>	<b>237</b>
<b>Chapter 14 Options inside the water box</b>	<b>241</b>
Water governance reform: strengthening policy, planning and institutions	242
Consulting with stakeholders and avoiding corruption: accountability in planning, implementation and management	251
Capacity development for more effective action	254
Developing appropriate solutions through innovation and research	258
Data and information needs	260
Financing	261
<b>Chapter 15 Options from beyond the water box</b>	<b>269</b>
Promoting win-win scenarios by creating space for change	270
Clearing pathways towards win-win situations: avoiding negative impacts	273
Promoting win-win scenarios through cooperation and knowledge	275
Sustaining change: changing habits through awareness	285
Ensuring sustainable financing	286
<b>Chapter 16 The way forward</b>	<b>291</b>
Making water an integral part of all planning and management decisions	292
Working towards better development outcomes	295
Deciding – and acting!	296
<b>Appendix 1 World Water Development Report indicators</b>	<b>298</b>
<b>Appendix 2 Water-related goals and objectives of major conferences and forums, 1972-present</b>	<b>302</b>
<b>Abbreviations, data notes and units of measure</b>	<b>306</b>
<b>List of maps, figures, tables and boxes</b>	<b>308</b>
<b>Index</b>	<b>313</b>
